

Belt Drive Wall Supply Fans

SXB SERIES

Designed for commercial and light duty industrial applications.

Photo above and Dimension illustration below show fan with cabinet, back guard and motorized steel control dampers (Standard).

These fans are typically used for low pressure applications with little to no duct work.

The SXB series is designed and constructed for efficient and economical operation at low speeds and low noise levels. Please see previous page for exhaust fan applications.

FEATURES

- Heavy gauge steel fan panel with deep spun and flared venturi for maximum efficiency.
- Heavy gauge welded steel motor and bearing supports.
- Galvanized heavy gauge steel fan blades that are statically and dynamically balanced.
- Heavy duty cast iron pillow block bearings.
- TEFC motors are standard.
- All dampers come with Belimo actuators.
- Complete with cabinet, motorized steel control damper and discharge guard.

For three phase motors, substitute "*" with "M" for 230/460 volt (If 208V required please specify) or "P" for 575 volt.
 Fan blades tested in accordance with AMCA standard 210, figure 12.
 dBA ratings shown are measured at 0" static pressure and should be used as a guideline only.
